***Response to Amendment***

1. Applicant's arguments filed 1/12/2005 with respect to claims 24, 25, 30-31, 38, 64, 66, 83, 89, 90-94 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 31, 90, and 94 are rejected under 35 U.S.C. 102(e) as being anticipated by Tsai (#6,775,557)

The claims read on Tsai as follows: As pertains to claims 31, 90, and 94, Tsai teaches (col.1,ln.9-17) using secondary information (including audio information) embedded in audio passages. An answering machine embodiment (figure 3) includes communicating the secondary information to a caller during an OGM (outgoing message) (col.6,ln.47-58). Thus the outgoing message of the answering machine includes a selected background sound incorporated (embedded) therein which is played to the listener during playback (during playing of the OGM).

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
